SUMMARY

Aspiring Computer Science student with a strong foundation in Java programming. Quick learner with the ability to adapt to dynamic environments. Skilled in problem-solving, logical thinking, and developing efficient software solutions.

EDUCATION

Bachelor of Technology — CSE (AI & ML) Kalasalingam Academy of Research and Education	2023 – present CGPA – 8.64
Higher Secondary Education (MPC) Sri Chaitanya Junior College	2021 – 2023 Percentage – 89.7%
Secondary School Certificate (SSC) Sri Srinivasa High School	2020 – 2021 Percentage – 100%

PROJECTS

Digital Ration Distribution System

Tech Stack: HTML, CSS, JavaScript, Node.js, Supabase (PostgreSQL).

- Developed a full-stack web application with role-based access (customer, distributor, government), enabling secure on-the-slot booking and real-time registration.
- Integrated a machine learning model using Scikit-learn via a Flask API to predict and classify ration card eligibility based on socio-economic data.
- Built a real-time admin dashboard with inventory tracking, analytics visualization, QR code-based token system, and enabled notifications using Socket.io and Twilio.

EMG-Based Parkinson's Disease Detection System

Tech Stack: Arduino Uno, embedded C, EMG sensors and signal processing

- Developed a real-time EMG-based system using Arduino Uno to capture and analyze muscle activity.
- Applied signal processing techniques to detect abnormal neuromuscular patterns associated with Parkinson's disease.
- Built a low-cost, non-invasive prototype with real-time visualization for healthcare monitoring.

SKILLS

Programming Languages: Java

Web Technologies: HTML, CSS, JavaScript

Tools: Git, GitHub, Visual Studio Code

Soft Skills: Problem Solving, Team Collaboration, Communication, Analytical Thinking
