

# GANESH BOBBALA

 Ganeshbobbala |  Portfolio |  ganesh-bobbala |  ganeshbobbala479@gmail.com |  +91 8247087380

## SUMMARY

Seeking opportunities to apply and enhance my skills in Java, SQL, and Web Development. Committed to continuous learning and problem-solving, with a strong interest in developing reliable and efficient software solutions. Eager to contribute to organizational success while growing as a software Engineer.

## EDUCATION

|                                                                                                                    |                                  |
|--------------------------------------------------------------------------------------------------------------------|----------------------------------|
| <b>B. Tech in Computer Science and Engineering (AI &amp; ML)</b><br>Kalasalingam Academy of Research and Education | 2023 – 2027<br>CGPA: 8.64        |

| <b>Secondary School Certificate (SSC)</b><br>Sri Srinivasa High School                                             | 2020 – 2021<br>Percentage: 100%  |

## SKILLS

|                               |                                                                  |
|-------------------------------|------------------------------------------------------------------|
| <b>Programming Languages:</b> | Java, python (Basics)                                            |
| <b>Web Technologies:</b>      | HTML, CSS, JavaScript                                            |
| <b>Database Technologies:</b> | SQL                                                              |
| <b>Core concepts:</b>         | Object-Oriented Programming (OOP), DBMS                          |
| <b>Tools &amp; Platforms:</b> | Git, GitHub, Visual Studio Code                                  |
| <b>Soft Skills:</b>           | Problem Solving, Team Collaboration, Communication, Adaptability |

## PROJECTS

**Smart PDS: Automated Time-Slot Booking & Distribution System** | HTML | CSS | JavaScript | Node.js | Socket.io | Supabase | Python | Flask | Scikit-Learn

- Developed a scalable full-stack web application with role-based authentication, automated time-slot booking, multilingual support (7 languages), and Progressive Web App (PWA) capabilities.
- Integrated a Scikit-learn eligibility prediction model using a Flask API to automate beneficiary verification and improve the efficiency of the distribution process.
- Built real-time administrative dashboards using Socket.io, Supabase PostgreSQL, and Chart.js for live booking synchronization, inventory tracking, analytics, and secure transaction processing.

**Behavior Recognition in Videos for Autism Detection** | Python | TensorFlow/Keras | OpenCV | MediaPipe | HTML | CSS | JavaScript

- Developed an AI-powered web application for autism behavior recognition by analyzing uploaded videos using CNN-LSTM deep learning models for accurate behavioral pattern classification.
- Utilized OpenCV and MediaPipe for video preprocessing, human pose estimation, and feature extraction to improve the accuracy and reliability of behavior detection.
- Integrated the trained deep learning model into a responsive web interface, enabling secure video uploads, real-time prediction, and visualization of behavioral analysis results. [Live Demo](#)
