SUMMARY

Aspiring Computer Science student with a strong foundation in Java programming, web development, and software engineering concepts. Skilled in problem-solving, analytical thinking, and building responsive web applications. Quick learner with a passion for building efficient and real-world software solutions in dynamic environments

EDUCATION

Bachelor of Technology — CSE (AI & ML) Kalasalingam Academy of Research and Education	2023 – Present CGPA: 8.64
Higher Secondary Education (MPC) Sri Chaitanya Junior College	2021 – 2023 Percentage: 89.7%
Secondary School Certificate (SSC) Sri Srinivasa High School	2020 – 2021 Percentage: 100%

PROJECTS

Digital Ration Distribution System

- Developed a full-stack web application with role-based access for customers, distributors, and government authorities.
- Integrated a Scikit-learn machine learning model through a Flask API to predict ration card eligibility.
- Built a real-time admin dashboard with inventory tracking, analytics visualization, a QR-based token system, and notification features using Socket.io and Twilio.

MarroeCode – AI-Powered Coding Practice Platform

- Developed a full-stack coding practice platform with a modern IDE-style interface for writing, executing, and analyzing code in real time.
- Built an AI-powered Python AST analysis engine to detect code complexity, logic errors, and provide intelligent coding feedback and execution insights.
- Integrated Supabase PostgreSQL database with interactive React dashboards to store coding history, track user performance, and visualize learning analytics.

SKILLS

Programming Languages:	Java, JavaScript
Web Technologies:	HTML, CSS, React.js, Node.js, Express.js
Database:	PostgreSQL, Supabase
Tools & Platforms:	Git, GitHub, Visual Studio Code
Soft Skills:	Team Collaboration, Communication, Analytical Thinking, Adaptability

CERTIFICATIONS

- Software Engineering Job Simulation – JPMorgan Chase & Co. (Forage)
- Generative AI for Beginners – Simplilearn SkillUp
