SUMMARY

Motivated and enthusiastic Computer Science student with knowledge of Java, Python, HTML, CSS, JavaScript, and SQL. Gained hands-on experience through academic and personal projects in software and web development. Passionate about Full-Stack Development, problem-solving, and continuous learning. Seeking an opportunity to apply and enhance technical skills while contributing to innovative software solutions in a professional environment.

EDUCATION

B. Tech in Computer Science and Engineering (AI & ML) Kalasalingam Academy of Research and Education	2023 – 2027 CGPA: 8.63
Higher Secondary Education (MPC) Sri Chaitanya Junior College	2021 – 2023 Percentage: 89.7%
Secondary School Certificate (SSC) Sri Srinivasa High School	2020 – 2021 Percentage: 100%

SKILLS

Programming Languages:	Java, python
Web Technologies:	HTML, CSS, JavaScript, React.js
Database Technologies:	MySQL
Tools & Platforms:	Git, GitHub, Visual Studio Code
Core Concepts:	Object-Oriented Programming (OOP), DBMS
Soft Skills:	Problem Solving, Team Collaboration, Communication, Adaptability

PROJECTS

Smart PDS: Automated Time-Slot Booking & Distribution System | HTML | CSS | JavaScript | Node.js | Socket.io | Supabase | Python | Flask | Scikit-Learn

- Built a multi-role full-stack web application with 7-language localization and PWA support, streamlining distribution through automated time-slot booking.
- Integrated a Scikit-learn classification model via Flask API to predict ration card eligibility (APL/BPL) using demographic and income-based inputs for intelligent eligibility classification.
- Built a real-time admin dashboard using Socket.io and Supabase to sync bookings, track inventory via Chart.js, and secure tickets with SHA-256 hashes.

MarroeCode – AI-Powered Coding Practice Platform | React.js | Supabase | PostgreSQL | Python | AST

- Developed a full-stack coding practice platform with a modern IDE-style interface for writing, executing, and analyzing code in real time.
- Built an AI-powered Python AST analysis engine to detect code complexity, logic errors, and provide intelligent coding feedback and execution insights.
- Integrated Supabase PostgreSQL database with interactive React dashboards to store coding history, track user performance, and visualize learning analytics.

CERTIFICATIONS

- Software Engineering Job Simulation – JPMorgan Chase & Co. (Forage)
- Generative AI for Beginners – Simplilearn SkillUp
