SUMMARY

Aspiring Software Engineer with strong foundations in Java, web development, and software engineering principles, along with hands-on experience in building full-stack applications and scalable software solutions. Skilled in problem-solving, data structures, and developing responsive web applications using modern technologies. Passionate about learning emerging technologies, writing efficient code, and contributing to innovative software development projects in collaborative environments.

EDUCATION

B. Tech in Computer Science and Engineering (AI & ML) Kalasalingam Academy of Research and Education	2023 – 2027 (Expected) CGPA: 8.63
Higher Secondary Education (MPC) Sri Chaitanya Junior College	2021 – 2023 Percentage: 89.7%
Secondary School Certificate (SSC) Sri Srinivasa High School	2020 – 2021 Percentage: 100%

SKILLS

Programming Languages:	Java
Web Technologies:	HTML, CSS, JavaScript
Database Technologies:	MySQL
Tools & Platforms:	Git, GitHub, Visual Studio Code
Core Concepts:	Object-Oriented Programming (OOP), DBMS
Soft Skills:	Problem Solving, Team Collaboration, Communication, Adaptability

PROJECTS

Smart PDS: Automated Time-Slot Booking & Distribution System | HTML | CSS | JavaScript | Node.js | Socket.io | Supabase | Python | Flask | Scikit-Learn

- Developed a multi-role (customer/distributor/gov) full-stack web app featuring a 7-language localization system and Progressive Web App (PWA) support.
- Integrated a Scikit-learn classification model via Flask API to predict ration card eligibility (APL/BPL) using demographic and income data.
- Built a real-time admin dashboard using Socket.io and Supabase to sync bookings, track inventory via Chart.js, and secure tickets with SHA-256 hashes.

MarroeCode – AI-Powered Coding Practice Platform | React.js | Supabase | PostgreSQL | Python | AST

- Developed a full-stack coding practice platform with a modern IDE-style interface for writing, executing, and analyzing code in real time.
- Built an AI-powered Python AST analysis engine to detect code complexity, logic errors, and provide intelligent coding feedback and execution insights.
- Integrated Supabase PostgreSQL database with interactive React dashboards to store coding history, track user performance, and visualize learning analytics.

CERTIFICATIONS

- Software Engineering Job Simulation – JPMorgan Chase & Co. (Forage)
- Generative AI for Beginners – Simplilearn SkillUp
